Part A : Reading Test (50 Marks)

Read the passage and answer the questions no. 1 and 2.

The internet technology has helped design a large number of websites to facilitate social relations among people around the world. These are known as social networking services or social networks or social media. At present, Facebook is the most popular social media site. Google+, Twitter, LinkedIn, etc. are other frequently used social services. Social network services are web-based and hence, provide ways for the users to interact through the internet. These services make it possible to connect people across the borders and they have made the users feel that they really live in a global village.

Why are social networks expanding so fast? The answer is simple. Most of the social services are cost-free. You can make use of them free, paying a very little to your internet service provider. Secondly, you can make your personal profile public before the entire online community. It is like presenting yourself before the entire world. You can also look into other people's profile if you are interested. It is simple and easy. Thirdly, social networks allow users to upload pictures, multimedia contents and modify the profile. Some services like Facebook allow users to update their profiles. Fourthly, networks allow users to post blog entries. User profiles have a section dedicated to comments from friends and other users. Finally, there are privacy protection measures too. A user himself or herself decides over the number of visitors/viewers, and what information should be shared with others.

1. Choose the correct answer from the following alternatives:

"Today there are many jobs where you need English. This is because the world has become smaller. Vast distances are shortened by speedy transports. We can talk to a person thousands of kilometers away on the phone or the internet. So we can communicate with the whole world easily. English has made this communication easier.

There are many countries in the world with many languages, but to communicate with them, you cannot use all the languages. So you need a common language that you can use with more or less all the people in the world. English is that common language. You can talk to a Chinese toymaker, a French artist, an Arab ambassador or a Korean builder in one language – English. English, for us in Bangladesh, is all the more important. As we have seen earlier, we are too many people in a small country. So if you learn English, you have the best opportunity to find a good job, both within and outside the country. And that is good news for millions of our unemployed youths."

Different people use different languages for making (a) —. But a common language is necessary in (b) — to communicate with the people of the whole world. English has achieved the (c) — of being that language. It helps to get good jobs and have better (d) —. So, we should learn English properly as it helps (e) — our unemployment problem.

Meherjan lives in a slum on the Sirajgonj Town Protection Embankment. The whispering wind from the river Jamuna makes the fire unsteady. The dancing flames remind Meherjan of the turmoil in her life.

Not long ago Meherjan had everything— a family, arable land and cattle. The erosion of the Jamuna gradually consumed all her land property. It finally claimed her only shelter during the last monsoon. It took the river only a day to devour Meher's house, trees, vegetable garden and the bamboo bush. She had a happy family once. Over the years, she lost her husband and her family to diseases that cruel hunger and poverty brought to the family. Now, she is the only one left to live on with the loss and pain. The greedy Jamuna has shattered her dreams and happiness.

There are thousand others waiting to share the same fate like Meherjan. Bangladesh is a land of rivers, some of whose banks overflow or erode during monsoon. Erosion is a harsh reality for the people living along the river banks. During each monsoon many more villages are threatened by the mighty rivers like the Jamuna, the Padma and the Meghna. It is estimated that river erosion makes at least 100,000 people homeless every year in Bangladesh. Infact, river erosion is one of the main dangers caused by climate change. If we can't take prompt actions to adapt to climate change, there will be thousands of more Meherjans in our towns and villages every year.

1. Choose the correct answer from the following alternatives:

1 × 7 = 7

- (a) Meher's life was very happy before —.
- (i) the liberation (ii) the destruction of the river Jamuna

- (i) drought (ii) famine (iii) river erosion (iv) cyclone
- (d) The word 'turmoil' indicates —.
- (i) agitation (ii) reduction
- (iii) constant (iv) rigid
- (e) The word 'shatter' means —.
- (i) to destroy something (ii) to break something into pieces
- (iii) to erect something (iv) to complete something
- (f) The phrase 'whispering wind' means —.
- (i) wind that blows from across the river (ii) wind that blows with a hissing sound
- (iii) wind that helps someone make a fire (iv) wind that blows in summer
- (g) What is the main purpose of the author of the passage?
- (i) To explain the importance of river (ii) To describe the impact of monsoon
- (iii) To describe the effect of river erosion (iv) To describe the fate of a woman

May Day or International Workers' Day is observed on May 1 all over the world today to commemorate the historical struggle and sacrifices of the working people to establish an eight-hour workday. It is a public holiday in almost all the countries of the world.

Since the Industrial Revolution in the 18th and 19th centuries in Europe and the US, the workers in mills and factories had been working a long shift, fourteen or even more hours a day.

On May 1st in 1886, inspired by the trade unions, half of the workers at the McCormick Harvesting Machine Company in Chicago went on strike demanding an eight-hour workday. Two days later, a workers' rally was held near the McCormick Harvester Machine Company and about 6000 workers joined it. The rally was addressed by the labour leaders. They urged the workers to stand together, to go on with their struggle and not to give in to their bosses. At one point of the rally, some strike breakers started leaving the meeting place. The strikers went down the street to bring them back. Suddenly, about 200 policemen attacked them with clubs and revolvers. One striker was killed instantly, five or six others were seriously wounded and many others were injured. The events of May 1, 1886 are a reminder that workers will continue to be exploited until they stand up and speak out to gain better working conditions, better pay and better lives.

Fish population is in serious danger from global warming. Climate change is increasing the water temperature in rivers, lakes and seas. This means there is less food and oxygen available for fish. It also means the fish may not grow fully and may have fewer fish fries. Some fishes will become extinct if temperatures rise even by one or two degrees Celsius.

Climate change increases the pressure on fish population. Fishes are one of the world's most valuable biological assets. Forty percent of people in the world eat fish as their main source of protein. If we fail to reduce greenhouse gas emissions, we will increase the pressure on fish. As a result, people who depend on fish will suffer from hunger and poverty.

It is (a) — from the passage that global warming is (b) — a great threat to fish population. (c) — to global warming, food production and oxygen (d) — in water decrease. As a result, some fish may be extinct (e) —.

It was late summer, 26 August 1910. A little girl was born to a rich Catholic merchants' family of Albanian descent in a small town called Skopje, Macedonia. She was the youngest of the three siblings and was named Agnes Gonxha Bojaxhiu. Who could imagine at the time that this little girl would one day become the mother of humanity, loving and serving the poorest of the poor. Yes, we are talking about none other than Mother Teresa.

At the age of 12, she heard a voice from within that urged her to spread the love of Christ. She decided that she would be a missionary. At the age of 18, she left her parental home. She then joined an Irish Community of nuns called the Sisters of Loreto, which had missions in India. After a few months of training at the Institute of the Blessed Virgin Mary in Dublin, Mother Teresa came to India. On May 24, 1931, she took her initial vows as a nun. From 1931 to 1948, Mother Teresa taught geography and theology at St. Mary's High School in Kolkata. However, the widespread poverty in Kolkata had a deep impact on Mother Teresa and in 1948 she received permission from her superiors to leave the convent and devote herself to caring for the poorest of the poor in the slums of Kolkata.

Countries of the world rely heavily on petroleum, coal and natural gas for their energy sources. There are two major types of energy sources : renewable and non-renewable. Hydro-carbon or fossil fuels are non-renewable sources of energy. Reliance on them poses real big problems. Firstly, fossil fuels such as oil, coal, gas, etc. are finite energy resources and the world eventually will run out of them. Secondly, they will become too expensive in the coming decades and too damaging for the environment. Thirdly, fossil fuels have direct polluting impacts on earth's environment causing global warming. In contrast, renewable energy sources such as, wind and solar energy are constantly and naturally replenished and never run out.

Most renewable energy comes either directly or indirectly from the sun. Sunlight or solar energy can be used for heating and lighting homes, for generating electricity and for other commercial and industrial uses.

The sun's heat drives the wind and this wind energy can be captured with wind turbines to produce electricity. Then the wind and the sun's heat cause water to evaporate. When the water vapour turns into rain or snow and flows downhill into rivers or streams, its energy can be captured as hydroelectric energy.

Along with the rain and snow, sunlight causes plants to grow. Plants produce biomass which again can be turned into fuels such as fire wood, alcohol, etc that are called bioenergy. Scientists have identified hydrogen as another form of renewable energy source. It is the most abundant element in nature. But it does not exist separately as a gas. It is always combined with other elements, such as with oxygen to make water. Hydrogen, separated from another element can be burned as a fuel to produce electricity.

Our Earth's interior contains molten lava which gives off extreme heat. This heat inside the Earth produces steam and hot water which can be used as geothermal energy to produce electricity for heating homes, etc.

Ocean energy comes from several sources. Ocean's force of tide and wave can be used to produce energy. The surface of the ocean gets more heat from the sun than the ocean depths. This temperature difference can be used as energy source too.

1. Choose the correct answer from the following alternatives: $1 \times 7 = 7$

- (i) The main types of energy sources are —.

| | |
|---|---------------------------------|
| (a) natural and nuclear | (b) renewable and non-renewable |

21 February is a memorable day in our national history. We observe the day every year as international Mother Language Day. The day is a national holiday.

On this day, we pay tribute to the martyrs who laid down their lives to establish Bangla as a state language in undivided Pakistan in 1952. The struggle to achieve our language rights is known as the Language Movement.

The seed of the Language Movement was sown on 21 March 1948 when Mohammad Ali Jinnah, the Governor General of Pakistan, declared in a public meeting in Dhaka that Urdu would be the only state language of Pakistan. The declaration raised a storm of protest all over the country. The protest continued non-stop, gathering momentum day by day. It turned into a movement and reached its climax in 1952. The government outlawed all sorts of public meetings and rallies to stop it.

The students of Dhaka University defied the law and brought out a peaceful protest procession on 21 February 1952. When the procession reached near Dhaka Medical College, the police opened fire on the students, killing Salam, Rafiq, Barkat, Safiur and Jabbar. As a result, there were mass protests all over the country and the government had to declare Bangla as a state language. This kindled the sparks of independence movement of Bangladesh.

21 February is an (a) — day in our national history. We observe the day with a view to (b) — respect to the language martyrs. The heroic sons of the soil sacrificed their lives for the (c) — of Bangla as one of the state languages of Pakistan. This sacrifice led the Bangalees to the (d) — movement of Bangladesh. In other (e) —, language movement worked as the inspiration of our freedom.

'Heritage' is what we inherit from the past, live with in the present and then pass on to our children or future generation. Our unique source of life and inspiration is our cultural and natural heritage. When we speak of 'World Heritage', it indicates places and sites that we inherited from the past and pass on to the future generation of the entire world.

The 'Shat Gambuj Mosque' in Bagerhat is such a heritage. It became a UNESCO World Heritage Site in 1985.

Originally, the historic Mosque City was known as 'Khalifatabad'. It is situated at the outskirts of Bagerhat town..... not very far from the dense mangrove forest of the Sundarbans. Khalifatabad was a Muslim colony. It was founded by the Turkish general, a saint warrior Ulugh Khan Jahan in the 15th century. The infrastructure of the city reveals significant technical skills in many mosques as well as early Islamic monuments. Baked bricks were used for the construction of the buildings. The planning of the city was dominated by the tradition of Islamic architecture and the decorations were a combination of Mughal and Turkish architecture.

Khan Jahan built a network of roads, bridges, public buildings and reservoirs to make the city habitable. There were about 360 mosques in the city. Among them the most remarkable is the multi-domed Shat Gombuj Mosque. The mosque is unique in the sense that it has 60 pillars that support the roof, with 77 low height domes. The 4 towers at 4 corners have smaller domes at the top as well. The vast prayer hall has 11 arched doorways on the east and 7 each on the north and south for light and ventilation. It has 7 aisles running along the length of the mosque and 11 deep curves between the slender stone columns. These columns support the curving arches created by the domes. The thickness of the arches is 6 feet and have slightly narrowing hollow and round wall.

The west wall in the interior has 11 'mihrabs' (niche in mosque pointing towards Makkah). These mihrabs are decorated with stonework and terracotta. The floor of the mosque is made of brick. Besides being used as a prayer hall, Khan Jahan used the mosque as his court too. Today, it is one of the greatest tourist attractions and one of the best architectural beauties of Bangladesh.

Fish population is in serious danger from global warming. Climate change is increasing the water temperature in rivers, lakes and seas. This means there is less food and oxygen available for fish. It also means the fish may not grow fully and may have fewer fish fries. Some fishes will become extinct if temperatures rise even by one or two degrees celsius.

Climate change increases the pressure on fish population. Fishes are one of the world's most valuable biological assets. Forty percent of people in the world eat fish as their main source of protein. If we fail to reduce greenhouse gas emissions, we will increase the pressure on fish. As a result, people who depend on fish will suffer from hunger and poverty.

Fish population is seriously (a) — by global warming. Temperature is (b) — in the water bodies due to climate change, which is (c) — the amount of food and oxygen in the water. In want of food and oxygen, some of the fishes may be (d) — one day. So we have to take step to reduce greenhouse effect, otherwise many people may fall (e) — to poverty and hunger.

Part A : Reading Test (50 Marks)

Read the passage and answer the questions no. 1 and 2.

Michael Madhusudan Dutt was a celebrated 19th century Bangalee poet and dramatist. He was born in Sagordari on the bank of the Kopotaksho River, a village in Keshabpur Upazila under Jashore district.

From an early age, Michael aspired to be an Englishman in form and manner. Though he was born in a sophisticated Hindu family, he converted to Christianity as a young man, much to the ire of his family, and adopted the first name Michael. In his childhood, he was recognized by his teachers as a precious child with a gift of literary talent. His early exposure to English education and European literature at home and his college inspired him to imitate the English in taste, manners and intellect. Since his adolescence he started believing that he was born on the wrong side of the planet, and that his society was unable to appreciate his talent. He also believed that the West would be more receptive to his creative genius.

Madhusudan was an ardent follower of the famous English poet Lord Byron. So, after adopting Christianity, he went to Europe and started composing poems and plays in English. They showed his higher level of intellectual ability. However, he failed to gain the right appreciation. To his utter frustration he found that he was not esteemed as a native writer of English literature. Out of his frustration, he composed a sonnet in Bangla "Kopotaksha Nad" which earned him huge reputation in Bangla. Gradually he could realise that his true identity lay in Bengal and he was a sojourner in Europe. Afterwards he regretted his fascination for England and the West. He came back to Bengal and devoted himself to Bangla literature from this period. He has written the first Bangla epic "Meghnad Badh Kabya."

We have the ability to bring about a great change in our social, national and international life. But we cannot change everything. For example, humans can neither change the sun's radiation nor the earth's orbit around the sun. Rather we can control the increase in the amount of greenhouse gases and its effect on the atmosphere. It is a matter of great sorrow that only during the last hundred years the carbon dioxide concentration has been raised alarmingly in the atmosphere and we humans can be held responsible for this. Carbon dioxide level is increasing mainly for the burning of fossil fuels. Since the end of the 19th century, industrial activities increased rapidly giving rise to many factories. These factories required energy, which was produced through the combustion of coal and other energy sources such as mineral oil and natural gas which were also burned to heat our houses, run cars and airplanes or to produce electricity. Nowadays, about 85 million barrels of crude oil are burned daily. Every time a fossil raw material is burned, it releases carbon dioxide into the air. Thus, we are generating more and more greenhouse gases worldwide.

It is true that most of the natural phenomena are beyond our control, yet we can (a) — some aspects like the greenhouse effect by our responsible activities. We are highly responsible for (b) — radical climate change. Carbon dioxide is the main (c) — of climate change. Carbon dioxide is being (d) — in the atmosphere by the burning of fossil fuels. Part A : Reading Test (Marks 50)

Read the passage. Then answer the questions below :

21 February is a memorable day in our national history. We observe the day every year as International Mother Language Day. The day is a national holiday.

On this day, we pay tribute to the martyrs who laid down their lives to establish Bangla as a state language in undivided Pakistan in 1952. The struggle to achieve our language rights is known as the Language Movement.

The seed of the Language Movement was sown on 21 March 1948 when Mohammad Ali Jinnah, the Governor General of Pakistan, declared in a public meeting in Dhaka that Urdu would be the only state language of Pakistan. The declaration raised a storm of protest all over the country. The protest continued non-stop, gathering momentum day by day. It turned into a movement and reached its climax in 1952.

The government outlawed all sorts of public meetings and rallies to stop it. The students of Dhaka University defied the law and brought out a peaceful protest procession on 21 February 1952. When the procession reached near Dhaka Medical College, the police opened fire on the students, killing Salam, Rafiq, Barkat, Safiur and Jabbar. As a result, there were mass protests all over the country and the government had to declare Bangla as a state language. This kindled the sparks of independence movement of Bangladesh.

Air pollution comes from a wide variety of sources. In Bangladesh poisonous exhausts from industrial plants, brick kilns, old or poorly-serviced vehicles and dust from roads and construction sites are some of the major sources of air pollution.

We can minimise this type of pollution by making less use of motor vehicles and avoiding the use of vehicles older than 20 years. We may also use proper lubricants to lessen the level of emission and pollutants. We can encourage people to use Compressed Natural Gas (CNG) or Liquid Petroleum Gas (LPG) for fuelling their cars. The government may relocate hazardous industries like brick-kilns to areas away from human habitations.

Air pollution (a) — the ways in which the air is polluted. Air is the most important (b) — of human environment. Man cannot live a single (c) — without air. But we do not think that it is (d) — who pollute this most vital substance. It is (e) — in many ways.

In 1912, an American Shipping Company launched a new ship called 'The Titanic'. It was the largest and most luxurious ocean liner of the time. It weighted 52,310 tonnes and could carry about 3327 passengers. Experts said that nothing could make it sink. On April 10, 1912 the ship sailed on its first voyage across the Atlantic. It sailed from Southampton in England to New York in the United States with 2224 passengers of men, women and children. On April 15, just before midnight the ship struck the iceberg. The iceberg tore a great hole in the ship's side and the unsinkable Titanic began to sink. There was a great alarm on board. Warning bells rang out. Everyone rushed to the life boat but there was not enough room for them all. There was room for only 1178 passengers. The lifeboats took mostly the women and children. It was a terrible scene.

Part A : Reading Test (Marks 50)

Read the passage. Then answer the questions no. 1 and 2 :

Mainul Islam is a qualified farmer in Naogaon. Mr. Islam was very brilliant as a student. He took his higher education from Bangladesh Agricultural University in Mymensingh. He then came back home and started advanced farming. He has two other brothers who are graduates in different disciplines. The specialty of the Islam family is that they all are living in their village and all are renowned in their own fields. Mr. Islam's younger brother who is a Rajshahi University graduate, is a science teacher in a local school. His youngest brother is a Social Science graduate who likes to start a local NGO to work for this area. When asked, "What makes you decide to stay here in this village?" Mr. Islam smiled and said, "Look, it's true that we could leave this village for city life. I could be a banker or my brothers could be bureaucrats. But it did not attract us. We are sons of this soil. Yes, we have education but does education prepare a person only to be an officer? Don't we have any obligation to the soil that has made us what we are?" He also added that not every educated individual should be a job seeker. He added that since his discipline was agriculture, after his education he took the occupation of a farmer. In response to the question whether they had any frustration living in a village, he confirmed that they were indeed very pleased with their life. He said, "I work in my own farm, stay with my family members, pass time with my old friends, and sleep at my own home. All these count a lot."

Mr. Islam is right. Many people go to cities and forget or loosen their roots knowingly or unknowingly. Mr. Islam and his brothers are great, they haven't forgotten their roots. They not only stuck to their own roots, they have been torch bearers for others to be respectful of their roots.

Read the following text and answer the question no. 3 and 4 :

21 February is observed as Shaheed Dibosh every year throughout the country in remembrance of the martyrs of language movement of 1952. The commemoration begins at the early hours of the day with mourning songs that recall the supreme sacrifices of our language martyrs. People wear black badges and go to the Shaheed Minar in barefoot processions, singing mourning songs. They place wreaths at the Minar. Many of them visit the graves of the martyrs at Azimpur graveyard and pray for them. They also attend various programmes organised in remembrance of the language martyrs.

The UNESCO (United Nations Educational, Scientific and Cultural Organisation) on 17 November in 1999 proclaimed February 21 as the International Mother Language Day in recognition of the sacrifices of the martyrs for the rightful place of Bangla. Two Bangladeshi expatriates living in Vancouver in Canada, Rafiqul Islam and Abdus Salam, sent a proposal to Kafi Anan, the then Secretary General of United Nations. They requested him to declare 21st February as the International Mother Language Day. They added that the decision will honour and save all extinct languages of the world. As per their logical expectations, Prime Minister Sheikh Hasina then took prompt initiative by sending formal proposal to UNESCO. Finally, on 17 November 1999, UNESCO declared 21st February as the International Mother Language Day. The day is now annually observed worldwide to promote awareness of linguistic and cultural diversity and multilingualism.

Part A : Reading Test (Marks 50)

Read the following text and answer the questions no. 1 and 2:

Meherjan lives in a slum on the Sirajgonj Town Protection Embankment. The whispering wind from the river Jamuna makes the fire unsteady. The dancing flames remind Meherjan of the turmoil in her life.

Not long ago Meherjan had everything— a family, arable land and cattle. The erosion of the Jamuna gradually consumed all her land property. It finally claimed her only shelter during the last monsoon. It took the river only a day to devour Meher's house, trees, vegetable garden and the bamboo bush. She had a happy family once. Over the years, she lost her husband and her family to diseases that cruel hunger and poverty brought to the family. Now, she is the only one left to live on with the loss and pain. The greedy Jamuna has shattered her dreams and happiness.

There are thousand others waiting to share the same fate like Meherjan. Bangladesh is a land of rivers. Some of whose banks overflow or erode during monsoon. Erosion is a harsh reality for the people living along the river banks. During each monsoon many more villages are threatened by the mighty rivers like the Jamuna, the Padma and the Meghna. It is estimated that river erosion makes at least 100,000 people homeless every year in Bangladesh.

In fact, river erosion is one of the main dangers caused by climate change. If we can't take prompt actions to adapt to climate change, there will be thousands of more Meherjans in our towns and villages every year.

Mother Teresa was moved by the sight of the sick and dying on the streets of Kolkata. She founded a home for the dying destitute and named it 'Nirmol Hriday' meaning 'Pure Heart'. She and her fellow nuns brought the dying people off the streets of Kolkata to this home. They were lovingly looked after and cared for. Since then many men, women and children have been taken from the streets and carried to 'Nirmol Hriday'. These unloved and uncared for people get an opportunity to die in an environment of kindness and love. In their last hours they get human and divine love, and can feel they are also children of God. The Missionaries of Charity try to find jobs for those who survive, or send them to homes where they can live happily for some more years in a caring environment. Regarding commitment to family, Mother Teresa said, "May be in our own family, we have somebody, who is feeling lonely, who is feeling sick, who is feeling worried. Are we there? Are we willing to give until it hurts in order to be with our families, or do we put our interest first? We must remember that love begins at home and we must also remember that future of humanity passes through the family."

Mother Teresa's work has been recognized throughout the world and she received a number of awards. These include the Pope John XXIII Peace Prize (1971), the Nehru Prize for Promotion of International Peace & Understanding (1972), the Balzan Prize (1978), the Nobel Peace Prize (1979) and the Bharat Ratna (1980).

Mother Teresa died at the age of 87, on 5 September 1997. The world salutes her for her love and compassion for humanity. She has taught us how to extend our hand towards those who need our love and support irrespective of creed, caste and religion. The picture of Mother Teresa, draped in a white and blue-bordered sari, with a wrinkled face, ever soft eyes and a saintly smile, lives on in our mind.

Read the following text and answer the questions no. 5 and 6 :

Rabindranath Tagore was one of the most leading poets in the history of the world literature. He was at the same time a poet, a novelist, a dramatist, a philosopher and a musician. He was born in the renowned Tagore family on 7 May, 1861. After the completion of his house education, he was sent to school. But he did not like institutional education. So, arrangements were made at house for his proper education. In his thirteenth year, Rabindranath along with his father went to visit the Himalayas. At the age of seventeen, he was sent to London to study law. But he studied literature with Professor Henry Morley only for a few months and then returned home. Only at the age of eight, he started composing poems. He wrote his poetic novel 'Banaful' at the age of fifteen. When he was sixteen, his poems and essays were being published in journals. After returning from England, he began to write tirelessly in all branches of literature. In 1911, he translated his poems of 'Gitanjali' into English which brought him the highest honour in the form of the Nobel Prize in 1913.

One year after his awarding of the Nobel Prize, he was made a knight by the British Government which he rejected as a protest against the atrocities of the British Government at Jallianwala Bagh. The University of Oxford honoured him with D Lit in 1940. Earlier in 1921, he laid the foundation of Viswa Bharati. At the age of 80, Rabindranath Tagore breathed his last.

3. Read the following text and fill in each gap with a suitable word based on the information of the text: 1 × 5 = 5

In a speech at the 90th science congress, internationally acknowledged scientist and former Indian President Mr. APJ Abdul Kalam mentioned a very important aspect of this mankind's future energy crisis. He pointed out that the era of wood and bio-mass has almost come to an end. The age of oil and natural gas would soon be over within the next few decades. Massive burning of world's coal reserves may lead to a worldwide ecological disaster because coal burning emits the highest amount of carbon in the atmosphere. So according to Kalam, the only solution that mankind can look to is the massive use of solar energy in future because it has some advantages over other forms of renewable energies.

Now, why has Kalam put so much importance to the issue of energy? The energy sources have always been a major factor of change throughout history. The world's petroleum consumption has increased from 3 billion barrels annually in 1930 to 37 billion barrels annually today. In the next quarter century, the world's population is expected to be about 8 billion which is 30 percent higher than today. Developing countries will grow their economics about two times faster than industrialized countries.

Global economic growth is expected to continue at 3 percent per year. Consequently, the global demand for energy will grow at about 1.7 percent per year on an average. It indicates a 50-percent rise of energy consumption by 2030. If the world's daily petroleum consumption is 100 million barrels now, it will rise to 150 million barrels by that time. The present reserve of hydrocarbon energy resources is limited and it will not be sufficient to meet the future energy challenges of the world. Hence, leading industrial countries have taken initiatives to use alternative energy sources mainly known as green or renewable energy sources. The bottom line of Kalam's speech indicates the concern of mankind in the 21st century.

Mr. APJ Abdul Kalam was not only a scientist but also the President of India. At the 90th science congress, he (a) — a speech on the aspect of mankind's future energy crisis. He (b) — pressure on the (c) — of solar energy. (d) — to the history, the energy sources have always been a major factor of change all the general people should have a (e) — about the fact.

Pritilata Waddadar was born in Chattogram on 5 May 1911. She was a meritorious student at Dr Khastagir Government Girls' School in Chattogram and Eden College, Dhaka. She graduated in Philosophy with distinction from Bethune College in Kolkata. In her college days, Pritilata was an activist in the anti-British movement. All through her life, she dreamt of two things: a society without gender discrimination, and her motherland free from British colonial rule.

So she decided to fight against the British rule. Soon after, Pritilata became the head teacher of Nandankanon Aparna Charan School in Chattogram. Gradually, she involved herself in Surja Sen's armed resistance movement. Surja Sen was a famous anti-British movement organiser and revolutionary activist in Chattogram area at that time. In 1932, Surja Sen planned an attack on the Pahartali European Club. The club was well-known for its notorious sign at its entrance: Dogs and Indians not allowed. Surja Sen assigned Pritilata to lead a team of 10-12 men to attack the Club. The raid was successful but Pritilata, dressed as a man, failed to get out of the club. She committed suicide by taking potassium cyanide to avoid arrest. She proved that women can work like men. She also proved that women too needed to be prepared to sacrifice their lives for freedom from the British colonial rule. Her dream finally came true. The British rule came to an end in 1947 though she couldn't see it during her lifetime.

Part A : Reading Test (Marks 50)

Read the following passage and answer the questions no. 1 and 2:

Michael Madhusudan Dutt, was a celebrated 19th century Bangalee poet and dramatist. He was born in Sagordari on the bank of the Kopotaksho River, a village in Keshabpur Upazila under Jashore district.

From an early age, Michael aspired to be an Englishman in form and manner. Though he was born in a sophisticated Hindu family, he converted to Christianity as a young man, much to the ire of his family and adopted the first name Michael.

In his childhood, he was recognised by his teachers as a precious child with a gift of literary talent. His early exposure to English education and European literature at home and his college inspired him to imitate the English in taste, manners and intellect.

Since his adolescence he started believing that he was born on the wrong side of the planet and that his society was unable to appreciate his talent. He also believed that the West would be more receptive to his creative genius.

Madhusudan was an ardent follower of the famous English poet Lord Byron. So after adopting Christianity, he went to Europe and started composing poems and plays in English. They showed his higher level of intellectual ability.

However, he failed to gain the right appreciation. To his utter frustrations he found that he was not esteemed as a native writer of English literature. Out of his frustration, he composed a sonnet in Bangla "Kopotaksha Nad" which earned him huge reputation in Bangla.

Gradually, he could realise that his true identity lay in Bengal and he was a sojourner in Europe. Afterwards, he regretted his fascination for England and the West. He came back to Bengal and devoted himself to Bangla literature from this period. He has written the first Bangla epic *Meghnad Badh Kabya*.

Read the following text and answer the questions no. 3 and 4 :

Humans can neither change the sun's radiation nor the earth's orbit around the sun. But they can control the increase in the amount of greenhouse gases and its effect on the atmosphere. Only during the last hundred years the carbon dioxide concentration has been raised alarmingly in the atmosphere and we humans can be held responsible for this. The main cause of the increase in carbon dioxide level in the atmosphere is the burning of fossil fuels. Since the end of the 19th century, industrial activities increased rapidly giving rise to many factories. These factories required energy which was produced through the combustion of coal. Besides coal, other sources of energy such as mineral oil and natural gas were also burned to heat our houses, run cars and airplanes or to produce electricity. Nowadays, about 85 million barrels of crude oil are burned daily. Every time a fossil raw material is burned, it releases carbon dioxide into the air.

Therefore, it is clear that more and more greenhouse gases like carbon dioxide are being generated worldwide by humans. Moreover, we are also strengthening the greenhouse effect by deforestation, which means cutting down trees. Every year enormous areas of forests are destroyed by people to obtain wood and to clear regions for mining and to create pasture. This loss of the forest causes dual problems. Trees that are burned up release large volumes of carbon dioxide gas into the air. On the other hand, as forests absorb a lot of carbon dioxide from the air and deliver oxygen instead, we also destroy an important storehouse of carbon dioxide when we clear forests.

3. Read the above text and fill in each gap with a suitable word based on the information of the text: 1 × 5 = 5

Fossil fuels are burned at an alarming rate due to (a) —. Coal is one of the fuels used for (b) — energy. Our atmosphere is being polluted for the (c) — of greenhouse gases day by day. Our (d) — on fossil fuels should be reduced. We should not destroy our (e) — which play a vital role to produce oxygen.

4. Match the parts of the sentences in columns 'A', 'B' and 'C' to write seven complete sentences : 1 × 7 = 7

| (e) Human beings | (v) be aware and take initiative | (v) wood for habitation and furniture. |
| (f) Burning coal in factories | (vi) are cutting down | (vi) to protect our earth for future generation. |
| (g) So, we should | (vii) consume | (vii) trees for various purposes. |

Read the following text carefully and answer the questions no. 5 and 6 :

Bangladesh is blessed with huge inland open water resources. It has numerous rivers, canals, beels, lakes and vast areas of floodplains. Hakaluki haor is one of the major wetlands of Bangladesh. With a land area of 18,386 hectares, it supports a rich biodiversity and provides direct and indirect livelihood benefits to nearly 1,90,000 people. This haor was declared an Ecologically Critical Area in April 1999 by the government of Bangladesh. Hakaluki is a complex ecosystem, containing more than 238 interconnecting beels and jalmahals. The haor falls under two administrative districts, Maulvibazar and Sylhet. Some 1,90,000 people live in the area surrounding the haor.

The haor is a very important resting place for migratory waterfowls flying in from the north. The most interesting species is the Barheaded Goose, which is now hardly seen in fresh water wetlands. Many other important species of waterfowls make the haor their temporary home. Unfortunately, illegal poaching has been a threat to the waterfowl population in this vast wetland. Hakaluki haor is known as a good grazing land in winter. People from villages around the haor and also from distant areas send their herds for grazing. During this time, herders make temporary shelters near the beels and graze their animals for a period of 4 to 5 months. The haor had very dense swamp forests in the past, but deforestation and lack of conservation practices have virtually destroyed this unique forest in the last two decades.

*[According to the Syllabus of 2023]***Time : 3 hours; Total Marks : 100***[N.B. The figures in the right margin indicate full marks.]***Part A : Reading Test (Marks 50)****Read the passage and answer the questions no. 1 and 2 :**

Eid is the main religious festival of the Muslims in Bangladesh. Eid means happiness. Everyone wants to share this happiness with near and dear ones. So most of the people, who are living outside their homes for different reasons have a strong desire to get back home during the Eid vacation. As a result, there is a mad rush to board buses, trains, or launches for going home. This often causes transport accidents that take away many lives. However, these cannot stop people from going home to meet their family, in-laws, or friends. What makes people rush for their homes in spite of serious hazards? This is nothing but people's desire to return to the roots. Do human beings have roots like the trees? The answer is 'yes' but unlike the roots of the trees they are invisible, they lie in our minds. It's these roots that make a bond between us and family members, in-laws, friends, neighbours or even between us and the land where we were born and grew up. In that sense our families, our land of birth, relatives, our culture, traditions, or surroundings are our roots. And wherever we stay, we feel the power of our roots. It's our roots that develop our identity making us what we are. When we lose that bond, we become rootless. Human beings who do not have any roots are a non-entity. In other words, they do not have an identity. They do not know where they are from, and / or where they are heading to. This often makes them feel empty and lost.

1. Choose the correct answer from the following alternatives :

Read the following passage and answer the questions no. 3 and 4 :

Air pollution comes from a wide variety of sources. In Bangladesh poisonous exhaust from industrial plants, brick-kilns, old or poorly-serviced vehicles and dust from roads and construction sites are some of the major sources of air pollution. We can minimise this type of pollution by making less use of motor vehicles and avoiding the use of vehicles older than 20 years. We may also use proper lubricants to lessen the level of emission and pollutants. We can encourage people to use Compressed Natural Gas (CNG) or Liquid Petroleum Gas (LPG) for fuelling their cars. The government may relocate hazardous industries like brick kilns to areas away from human habitations.
